REMOTE CONTROLLED LIGHTING

Care and Use
The light sculpture can be used indoor or outdoor.
The remote has a range of approximately 7-10 feet and must be aimed directly at the light sculpture. If more than one light is purchased, the remote may control multiple lights.
To change the lights independently, the lights should be placed at least 3 feet away from each other.
If used outdoor, we do recommend storing it in a warm and dry location during inclement weather.
Replacement lights and remotes may be ordered by calling 1-800-628-8321.

Installing and Replacing Light Batteries
Each light requires 3 AAA batteries (not included)
When using a high-end alkaline battery, the expected battery life is 75-100 hours.

Replacing Remote Battery
Each remote requires 1 CR2025 3V battery (included)
Slide battery drawer out.
Remove battery. Place new battery with aligned polarity.
Push battery drawer in.

Warnings
• Always replace the whole set of batteries at one time, taking care not to mix old and new batteries or batteries of different types or brands.
• Clean the battery contacts and those of the device prior to battery installation.
• Ensure the batteries are installed correctly with regard to polarity (+ and -). Failure to insert battery in the correct polarity, as indicated in the battery compartment, may shorten the life of the battery or cause battery to leak.
• Misuse can cause battery to overheat, rupture, leak or explode, resulting in personal injury and/or property damage.
• Exhausted batteries should be removed immediately, and must be recycled or disposed of properly according to state or local government ordinances and regulations.
• DO NOT expose batteries to fire or water. Do not dispose of batteries in a fire - batteries may leak or explode.
• Never touch damaged or leaking batteries - this could result in burn injuries or cause serious internal injuries if swallowed. Obtain medical attention immediately if this occurs.
• Proposition 65 Warning: All batteries may contain lead, cadmium, and mercury, chemicals known to the state of California to cause cancer, birth defects, and other reproductive harm. Wash hands thoroughly after handling batteries.
